The Key To Boundless Possibilities In 2015

Posted on December 31, 2014 by RedneckRosarian

As we say goodbye to 2014 and the chill of January grips us, I am reminded that the true life of a plant lies beneath the ground. The root system of any plant is the foundation by which the beautiful form and structure of a plant is made. It is from this structure that beautiful blooms and foliage are produced. Without a strong foundation upon which to build, plants are spindly, unsupported, and can ultimately fail.

Once that foundation is established, the plant enjoys a season of growth, and afterwards, pruning must take place.

Pruning is the cutting away of the old growth to allow for new. For many plants, pruning takes place during a period of dormancy.

Bloom comes off the rose industry

In recent years, time-strapped homeowners have traded their big tea roses for the easier-growing compact shrub variety. Many hybrid varieties may disappear from the marketplace.

Reporting from Sacramento — Future generations may never know the beauty of Diana, Princess of Wales; sniff Catalina in the sunshine; or fall for Beloved.

For a century, devoted gardeners have appreciated the marvels of delicate and finicky hybrid roses and referred to them by name, like pets or family. The product of generations of breeding, the queen of

Deep South & Carolina Districts Mid Winter Meeting of the American Rose Society

Join us for interviews and updates from the Mid-Winter meeting of the Deep South and Carolina districts of the American Rose Society meeting this week in historic Savannah Georgia.

Top rose gardeners from the southeast have gathered in Savannah Georgia for a weekend of seminars and speakers.

Founded in 1892, the American Rose Society is the oldest single plant horticultural society in America. The ARS is an educational, nonprofit organization dedicated exclusively to the cultivation and enjoyment of roses. ARS supports its members by providing educational programs, resourceful publications, and continuing research. We have more than 300 affiliated rose societies in our national network.

Most ARS members are home gardeners like you who enjoy growing roses and want to expand their knowledge of rose culture. Many members also enjoy the thrill of exhibiting their roses in competition with other rose-lovers or participating in photography contests and other rose-related activities. The American Rose Society has developed standards and guidelines for judging these competitions. We also publish a schedule of the various workshops, seminars, garden events and rose shows across the United States. The Society publishes an award-winning bi-monthly magazine, American Rose, which is devoted exclusively to roses and rose culture.

ARS is headquartered on the grounds of the beautiful American Rose Center near Shreveport, Louisiana. The American Rose Center features more than 20,000 rose bushes that comprise nearly 400 cultivars of modern and old garden roses.

UNDERCOVER BOSS

An aerial night view of a city skyline. The sky is a deep blue, transitioning from a lighter blue near the horizon to a darker blue at the top. In the foreground, several tall skyscrapers are visible, their windows glowing with warm yellow light. The most prominent building in the center has a large, illuminated sign that reads "UNDERCOVER" in bold, yellow, sans-serif capital letters. The building's facade is dark, and its windows are lit up. The overall scene is a vibrant, high-angle view of a modern city at night.
